LARAS NURHAYATUNNUFUS
SOFTWARE ENGINEER

Bandung, West Java | 0821-7548-9156 | work.larasn@gmail.com | linkedin.com/in/larasn-828a3b160

SUMMARY

Experienced software developer with 3+ years in full stack development, data visualization, and automation. Proficient in modern web technologies and frameworks, with a focus on building scalable applications and data-driven solutions. Skilled in managing CI/CD pipelines and working in agile teams to deliver high-quality software. Recognized for innovation and problem-solving abilities in both independent and collaborative projects.

WORK EXPERIENCE

Full Stack Developer, Telkom Directorate Digital Business   Jan 2022 - Present

- Integrated multiple applications using REST APIs and SSO for large-scale ministry projects, leveraging PHP.
- Developed Decision Support System Dashboards with Next.js, TypeScript, and Highcharts.js, used by various government entities.
- Visualized data using Metabase, conducted data scraping, and automated processes with cron jobs using PHP.
- Led developer teams and received multiple Best Employee awards in 2022.
- Actively participated in product demonstrations and presentations to customers.

Front End Developer, Telkom Directorate Digital Business   July 2020 - Dec 2021

- Designed and developed the Digital Touch Point Website for Government Website using Figma and CodeIgniter.
- Enhanced CMS Dashboards for government projects using CodeIgniter.
- Built data visualizations with Tableau for governmental use.

PROJECTS

- **Scheduler Reminder via WhatsApp**
  Developed a scheduling program using Python and Google Apps Script to send automated reminders via WhatsApp, improving task management efficiency for users.

- **Monitoring Dashboard with Looker Studio**
  Built a comprehensive monitoring dashboard using Looker Studio to visualize key metrics, enhancing data-driven decision-making for the organization.
